

## CASTOR

Client:  **Kiewit**

Location: Vinaròs, Castellón Spain

Construction Site: Cadiz Yard - Spain

Completion Date: November 2011

Contract Type: BOQ

Total Weight: 13,100 tons

**Project Description:** The objective of the Castor project is the development of underground storage for natural gas, making use of the possibilities offered by the geological structure of the former oil field Amposta, by means of the fabrication of the necessary marine and terrestrial facilities. The Amposta field is located in Spanish waters in the Mediterranean Sea, in a water depth of 1.700 meters and 22 km away from the town of Vinaròs (Castellón).

**Scope of Work:** Our SOW included the construction engineering, partial procurement, and fabrication of the two jackets for the marine platform of the Castor Complex, a wellhead platform jacket (2.600 tons) and a production utility quarter jacket (10.500 tons).
