

SCOTT

Client: AMERADA HESS

Location: Scott Filed, British North Sea

Construction Site: Cadiz Yard - Spain

Completion Date: March 1993

Contract Type: BOQ

Total Weight: 9,100 tons

Project Description: The Scott platform is meant to produce crude oil and natural gas from the Scott and Telford fields. The Scott/Telford fields are located about 186 km northeast of Aberdeen in a water depth of 140 meters.

Scope of Work: Our SOW consisted on the construction engineering, partial supply (bulk materials), fabrication, onshore pre-commissioning and onshore commissioning assistance, load out and sea fastening of the Utilities Topsides. The final dimensions of the topsides were 45m x 35m x 25m. Transportation was performed in two sections.
