

VEGA PLEYADE

Client: **TOTAL**

Location: Tierra del Fuego, Argentina

Construction Site: Cadiz Yard - Spain

Completion Date: March 2015

Contract Type: Lump Sum

Total Weight: 3,500 tons

Project Description: Vega Pleyade is a gas field located in Tierra del Fuego, Argentina. The field is located approximately 20 km from the coast. The field will be developed with one platform, which includes three dry gas wells. The gas from the field will be transported via pipeline to the onshore Rio Cullen plant.

Scope of Work: Our SOW includes the engineering, procurement, construction (EPC), pre commissioning and commissioning of the WHP topsides, 4-legged jacket, and piles.
