

SOUTH ARNE

Client:

Location: Danish Coast

Construction Site: Cadiz Yard - Spain

Completion Date: August 2012

Contract Type: Lump Sum

Total Weight: 8,150 tons

Project Description: South Arne Phase 3 Project consisted on expanding the South Arne field in offshore Denmark with two additional wellhead platforms, one in the north (WHPN), one in the east (WHPE), and an interconnecting bridge. The WHPN has 12 wellheads, is isolated, and includes a Helideck. The WHPE has 6 wellheads and is joined to an existing platform by a bridge.

Scope of Work: Our SOW included the engineering, procurement and construction (EPC) of two wellhead platforms with weights of 1.600t and 1.350 t respectively, as well as the two jackets supporting these platforms, with a weight of 2.600t each. Detailed engineering of the EPC contract was subcontracted to KBR's London office, under our direct supervision.
